

AIMS Ireland - Association for Improvements in the Maternity Services (<https://www.activelink.ie/node/669>)

AIMS Ireland is a voluntary organisation that was formed in early 2007 by mothers dissatisfied with the Maternity Care System and ready to campaign for changes.

Our goal is to highlight and support normal birth and mother-friendly birth practices in Ireland.

We are a consumer led, campaign pressure group operating with a self-regulating committee elect and a body of members consisting of parents, consumers, health care professionals, and support group representatives throughout Ireland.

We offer free, independent, confidential support to women and their families.
