

<https://www.activelink.ie/node/300>

The Bluestack Foundation is a voluntary organisation run predominately by parents of childrens with special needs / disabilities, and professionals who not only work in the field but have a personal interest in it.

We are committed to enhancing the lives of people with special needs. Providing timely, pertinent and caring services to families with a special need dependant, empowering all to be treated equally, offered equal opportunities and supported in their quest to reach their full potential.

We work in the North West of Ireland, mainly in Donegal but also offer services to families based in Sligo and Leitrim or indeed families visiting the North West on holidays with a special need / disabled dependant.

Our Vision:

We see an inclusive community facility that offers a range of services and supports initially to families who have a dependant with special needs / disabilities, growing in to a range of supports and services, for the community at large, being supported and organised by people who have a special need / disability.
