

Enable Ireland (<https://www.activelink.ie/node/365>)

Enable Ireland, formerly known as Cerebral Palsy Ireland, was established in 1948 to enable people with physical disabilities to achieve maximum independence in their local communities.

Enable Ireland offers services for children and adults with physical disabilities nationwide.

Our services for children include programmes for babies and toddlers, pre-school age children and children and adolescents up to the age of 18.

Our services for adults include the development of personal and interpersonal skills supported by enterprise employment, as well as social, cultural and community programmes.
