

Acquired Brain Injury Ireland (<https://www.activelink.ie/node/417>)

Established in 2000, Acquired Brain Injury Ireland [formerly The Peter Bradley Foundation] is Ireland's leading provider of flexible and tailor-made services for people with an Acquired Brain Injury (ABI).

Our mission is to enable people with an acquired brain injury to live an independent life within the community, by providing and maintaining a supportive living environment. We understand that each person is an individual and each brain injury is particular to that individual therefore our approach is to provide a custom-made rehabilitation and care programme specific to their needs that will help to maximise their abilities. .

Acquired Brain Injury Ireland is a value-driven organisation. We pride ourselves on the quality of services we provide and we are the first organisation in Ireland to receive internationally recognised CARF accreditation as a provider of quality services for people with an ABI.

Acquired Brain Injury Ireland is a strong advocate for the estimated 10,000 people suffered from ABI in Ireland today, constantly seeking improved support services for those with ABI and their families.
