

Energy Action (https://www.activelink.ie/node/434)

Established in 1988, Energy Action is Ireland's first community-based energy project to address the problem of fuel poverty in Dublin. Energy Action has insulated 35,000 homes since its inception and has also supported several community-based organisations in other parts of the country through pilot schemes to develop their own capacity to tackle fuel poverty. The service is provided through the Better Energy Warmer Homes Scheme administered by the Sustainable Energy Authority Ireland.

Better Energy Warmer Homes Scheme

Energy Action is a registered supplier of the Sustainable Energy Authority of Ireland, BEWH scheme. Free measures included under the scheme.
