

GM-free Ireland Network (<https://www.activelink.ie/node/456>)

The GM-free Ireland Network is an association of individuals and organisations collaborating to keep the whole island of Ireland free of genetically modified (GM) animal feed, seeds, trees, crops, livestock, fish and food.

Our members include farmers, foresters, food producers, food distributors and exporters, leading chefs and restaurants, NGOs, professional associations, doctors, economists, lawyers, journalists, students, and consumers.
