

St Luke's Home (<https://www.activelink.ie/node/5056>)

The staff at St Luke's Home recognise their role as one of carer, facilitator, friend and advocate. We aim to create a Home like environment where all residents feel safe, secure and supported. Our objective is to enable the individual to attain their optimal potential for physical and mental health.

We will at all times encourage a participative approach amongst the residents in the planning of their care and also in discussion on quality of service provision. In recognition of family and kinship ties, we offer flexibility with visiting times and welcome a partnership approach between all involved with the residents' well-being.
