

Well Woman Centre (<https://www.activelink.ie/node/566>)

The Dublin Well Woman Centres were founded in 1978 to help Irish women access family planning advice and services. We now operate three medical centres, and influence public policy and awareness by speaking out on women's health issues.

The Three Key Objectives are:

- Advocating women's health and social well being.
- Providing an affordable, high quality, women focused health care service.
- Pioneering for change on the issues that impact on a woman's well-being.
