

Generation Ireland (<https://www.activelink.ie/node/85533>)

Generation gives you the skills you need and connects you with employers to find a job fast.

Many employers struggle to find entry-level staff with the right technical skills and personal attributes. Generation sources, trains, and energizes new recruits who can create value for your business from their first day on the job. Generation also works with employers to customize programs based on your specific needs.

We focus on tracking and raising the return on investment (ROI) that employers get from recruiting and training. As a result, your new hires operate at higher productivity, with longer retention, and faster speed to promotion.
