

Churchfield Community Trust

(<https://www.activelink.ie/node/99653>)

We offer training, work and enterprise skills with a particular focus on Adult Education, Woodwork, Painting and Horticulture. We bridge the gaps in formal education through Computer Skills, Cookery and Literacy. Sport and Leisure Activities are also included as they help our young men develop ways of managing their free time in a healthy and enjoyable way.

Personal Development is a key component in our programme as many of our participants need to make changes in attitudes, beliefs and behaviours, this can only happen as a result of personal reflection and development.

The project works from a relationship model. The focus is person centered and individual programmes are put in place in partnership with each participant according to his needs. We try to make respectful interventions, to foster responsibility and model open and honest communication at all times.

Mission Statement

Developing a caring community with young men in Churchfield and the surrounding areas.
