

Raynaud's & Scleroderma Ireland ^[1]

A nationwide organization providing support and information to sufferers and their families, **Raynaud's & Scleroderma Ireland** has been in existence since 1986.

Dependent upon sponsorship and volunteer effort, the registered charity works to spread information among healthcare professionals and to raise funds for research, diagnostic equipment, and treatment.

Services include an Annual Conference, telephone helplines, regular bulletins to members, regional support groups, and welfare assistance.

Afflicting 10% of the Irish, Raynaud's is a common circulation condition, but 2% of sufferers go on to contract Scleroderma, so careful attention and GP oversight is recommended.
